PRESS RELEASE

Executive Aircraft Maintenance (EAM) Achieves TPE331 Line Maintenance Training Milestone

Executive Aircraft Maintenance (EAM) of Scottsdale, AZ has offered an FAA-Approved TPE331 Turboprop Engine Line Maintenance Training since 2009. As of August 2011, EAM had trained 500 students. Class duration is normally five days, with five to ten students, and is offered in Scottsdale or at a customer location. Classes to date have been conducted throughout North and South America and Asia. For additional information please contact Terry Cooley at 480-991-0900 or terry.cooley@eamaz.com

EAM was established in 2002 as a division of Copper State Turbine Engine Company. EAM and its sister company, Glendale Aero Services, offer a broad array of General Aviation engine, airframe, avionics, and aerospace machining services to support customers in 24 countries, from its locations in Arizona and Alaska.
